

Seminar Overview

- The Japan Institute of Plant Maintenance (JIPM) approach to TPM
- Focus on zero accidents, zero breakdowns and zero defects
- Case study from an international organisation
- How to start TPM implementation
- Opportunities for questions and open discussion

Who should attend?

The seminar is designed for Senior Management, Functional Managers (e.g. Maintenance, Quality, Safety) and change agents (e.g. Lean, TPM) who are both considering or embarking on TPM implementation within their organisations.

What are the objectives?

The seminar is designed to give delegates an appreciation of the JIPM “Pillar” approach to TPM, demonstrating how TPM can be used to recognise and reduce losses, delivering sustainable business improvement.

The seminar will cover:

- What TPM is, how it will align to your business strategy and other improvement initiatives such as Lean
- The pillars of TPM and how they can drive the elimination of losses
- How to deploy TPM within your organisation

“I knew nothing about TPM before this workshop. I now feel like I have a foundation to build on”

Gemma Osula, National Skills Academy, Food & Drink

“Thought provoking, useful real world case examples”

Scott Spindley, Hain Daniels Group

“Very good presentations and presenters with a clear and concise message”

Graham Wilkinson, Carlsberg Group

How do I register?

The cost for the seminar is £95+VAT, inclusive of lunch, refreshments and access to the seminar materials.

The seminar will be held at Industry Forum Learning Centre, Birmingham on 5th December 2013, starting with registration at 8.30am and finishing at 1.15pm with time afterwards for networking. Places are strictly limited and allocated on a first come first served basis.

To register visit www.industryforum.co.uk or call Stacie Dicken on +44 (0)121 717 6614.
