

- Looking to grow your business?
- Want to identify key improvement areas of your business before your customers do?
- Are you aware that some leading vehicle manufacturers mandate MMOG-LE on their suppliers?
- Find out the implication of MMOG-LE on your business

## What is MMOG-LE?

- The Materials Management Operations Guideline/Logistics Evaluation (MMOG/LE) defines a common, industry-wide set of best practices can help to improve delivery performance.
- MMOG/LE is an assessment tool used to measure and improve materials planning and logistics efficiency within a manufacturing facility. It is designed to eliminate supply-related delivery risk for all partners within the supply chain. The intent of the MMOG/LE is to validate the organization has robust material planning and delivery processes in place to support overall business objectives.
- Vehicle manufacturers require annual submission of their suppliers' score and/or assessment. Although developed for the automotive industry, the tool can be used by any manufacturing organisation to evaluate the effectiveness and efficiency of their processes.

## Who should attend?

The seminar is designed for senior and middle Managers working directly in the logistics processes (incoming, internal or dispatch) and for personnel working in support functions such as manufacturing, purchasing and IT. It is also relevant for personnel who will be assisting in undertaking a MMOG-LE logistics evaluations in an organisation.

## What are the objectives?

The seminar is designed to make delegates aware of the structure of MMOG-LE, the assessment criteria and how to undertake an evaluation using the tool.

## Topics Covered

- Introduction to structure and content of MMOG-LE
- Navigating the MMOG-LE Assessment Document
- The MMOG-LE Assessment Process
- Evaluating the Assessment Results

## How do I register?

The cost for the seminar is £195+VAT, inclusive of lunch, refreshments and access to the seminar materials.
