

FREE WEBINAR

AS9145

Shaping the future of New Product Introduction in Aerospace and Defence

Overview

This free webinar aims to provide all attendees with an overview of the AS9145 standard, which provides the framework for the introduction of new products across the Aerospace and Defence sectors.

The standard aims to embed APQP and PPAP best practice within an organisation's New Product Introduction process.

The webinar will explore the

fundamentals, advantages and expected benefits of the APQP and PPAP processes from planning, product design and development through to process design, validation and on-going production.

Who should attend?

Senior Managers, Management Representatives, Implementation Teams, Internal Auditors and others who are involved in the auditing or implementation of

Advanced Quality Planning (AQP) activities including Control Plans.
