

MMOG.np

Introduction

In order to make it much easier to manage MMOG/LE assessments, we have developed a modern IT application called MMOG.np to replace the current Excel based workbook.

MMOG.np at a glance

- Browser based application
- Powerful underlying database
- Unlimited number of users
- Multi-language
- Different functionalities for suppliers and customers
- Will support all versions and profiles (current and future)
- All Excel functionalities (and more) are included
- Various licence models available to suit different sizes of business

Flexible architecture

An architecture adapted to the organisation

- Cloud solution accessible using the internet
- Locally installed:
 - Company intranet
 - Stand alone PC

A modern user interface

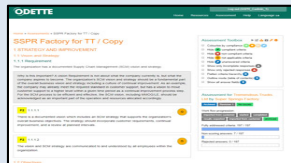

- Identical interface whichever architecture is selected
- Can be used with all the latest browsers (Chrome, Edge, Firefox, Opera, Safari)
- Responsive application (compatible with Tablet and Smartphone)

Compatible with existing Excel

- Current Excel assessments can be uploaded to the application
- The application can produce Excel format output, if required

Interoperability between platforms

MMOG NP Version 4.1

Customer perspective

Import - Export

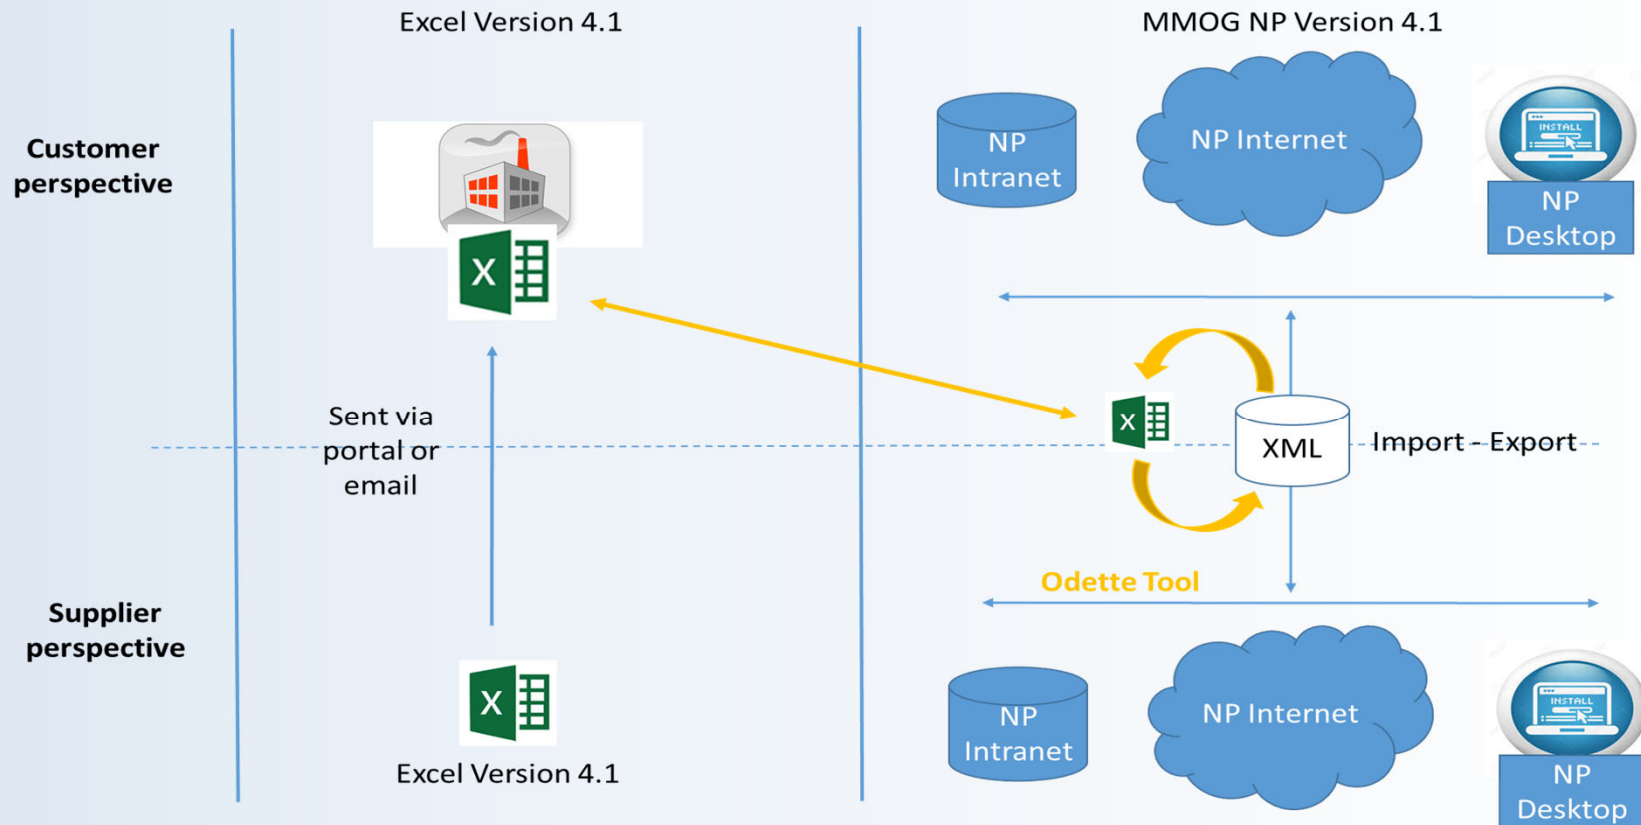

Supplier perspective

Import - Export

Transition period

« Multi »

Multi-Language

- For both the Application (User interface) and the Assessment (Catalogue)
- Answers can be given in multiple languages for the same criteria
- Available languages at launch: English, German, French, Chinese and more

Multi-Site

In a single database environment:

- A supplier will be able to manage assessments for all sites and all customers
- A customer will be able to manage assessments from all supplier sites

Multi-User

- No limitation on number of users
- Rights and roles are defined for each user
- Supplier users and Customer users have different rights and roles
- Several assessors are able to work on the same assessment

Security

Exchanges are based on XML files (Text files)

- Only a few KB compared to the average 2 MB for a completed Excel workbook
- No macros included
- When data is uploaded, it is stored in the MMOG.np database and the XML file can be deleted

Ecosystem

- On the cloud based application, registered users can only access the Ecosystem which contains their own data
- Data is not shared between different Ecosystems

User Access

- Each user needs a User ID and Password to access MMOG.np
- Each user is registered with a specific Role with specific Rights
- Company Administrators manage the Roles of their users

Audit Trail

- An historical view is available for each assessment: Who did what and when

User friendly

Modern User Interface (GUI)

- Easy access to the application using a browser
- Can be used on Windows PC, Mac, Tablet, Smartphone etc..
- Dynamic display of required data entry fields

Comprehensive Help

- On-line user guides
- Interactive help text
- Video tutorials

Efficient Workflow

- Clear responsibility and approval levels for the assessments
- Business partner agreements facilitated at the criteria level??
- Progress tracking: a status is attached to each assessment (e.g. New, In Progress, Completed, Under Review)

Efficiency

Import/Export functions

- Assessments are imported to and exported from the application in an XML message format
- The XML messages are either generated automatically by the application itself or by a free add-on provided with the application

Re-usable assessments

- A new assessment can be created in MMOG.np using the results of an existing assessment
- An existing Excel based assessment can be uploaded to MMOG.np to be completed (or archived)

Master Data

- Excel templates are provided to facilitate the bulk import of supplier, customer and own site details into MMOG.np

Licencing policy

Licence key

- A licence key is required to be able to use MMOG.np
- The licence key controls:
 - the highest version of the MMOG/LE catalogue which can be used
 - the maximum number of sites which can be assessed

Licence pricing

- www.odette.org/mmog/information

More to come

Analytics

- An analytics module, defined jointly by Odette and AIAG members, will be available next year

Catalogue V5

- MMOG/LE V5 will be released for use with MMOG.np only (i.e. no Excel workbook will be available).
- V5 will be made available free of charge to any existing users of MMOG.np
